EDGEWOOD RECREATION

Recreation Center - Edgewood, MD

The Harford County Recreation Center in Edgewood, MD is a 10,000 square foot addition to an existing Recreation and Community Center with offices, exercise rooms, and a Day Care Center. The addition consists of a new full size gymnasium with storage rooms, a media room and separate entrance and lobby waiting areas. The new gymnasium can be split into two half court areas, to be used for basketball, exercise areas for senior citizens or classroom space. The space is sized for several sports uses and can be used for basketball (full or 2-half court), tennis or volleyball.

The Recreation Center addition was designed so it can stand alone and be used during early morning or evening hours when the rest of the facility is closed. A complete sound system, scoreboard and lighting system was designed into the facility to allow multiple functions to take place, some at the same time. A motorized divider acoustic wall will allow the full court to be separated into two courts so differing functions can occur at the same time.

Tamperproof consideration was taken into account throughout the facility to prevent a recurring maintenance problem for staff and county employees.
