# PIERCE PAVILION

## Pierce County Fairgrounds Pavilion

The design team was commissioned to design a multipurpose facility for Pierce, Nebraska, a rural town in the Northeast area of Nebraska.

The facility was designed to replace an existing structure (pavilion) that had outlived its usefulness. The new building is a 12,000 square foot pre-engineered free-span structure that contains all the elements for a multipurpose facility, including a complete kitchen, restrooms, storage, stage and a large open area that will be used for receptions, expositions, ceremonies, presentations and large gatherings for reunions, dances, etc

Attached to one end of the main structure is a covered open-air beer garden for separate events; or in conjunction with events occurring in the main building.

A large foyer/reception area was included to allow entry from inclement weather prior to entering the main building, and as a method of reducing energy use.
